OLIVÉR NAGY

naolipth@gmail.com · LinkedIn · ORCID

Summary: PhD candidate, 8 years of experience in **economic policy**, **econometrics**, and **quantitative development**
Languages: Python, Shell, LaTeX, Stata, SQL, Julia, VBA, C#, R, Matlab, C++, Java, M-Code, CUDA (in this order)
Tools: Git, GitHub, LSEG DataStream, Bloomberg Terminal, MS Excel, Visual Studio, PyCharm, VS Code, Quarto, Marimo

EDUCATION

ELTE Eötvös Loránd University — Sep 2022 - Present
PhD in Economics — Budapest, Hungary
PhD Candidate since July 2024

Óbuda University — Sep 2020 - Jul 2022
BSc in Computer Science Engineering — Budapest, Hungary
Incomplete

Corvinus University of Budapest — Sep 2016 - Apr 2020
MA in Economic Analysis — Budapest, Hungary

Corvinus University of Budapest — Sep 2013 - Jul 2016
BA in Applied Economics — Budapest, Hungary

EXPERIENCE

Citibank Europe plc — Sep 2026 - Present
Hungarian Branch Office — Budapest, Hungary

Quantitative Developer,
Markets Quantitative Analysis (MQA)

- [C++17] Develop and maintain a **C++ curve-construction library** used to strip curves and quantify risk for linear rates products.
- [Testing] Develop Python-based tests and analytical tools to validate library behaviour, investigate pricing and risk discrepancies, and diagnose quantitative or implementation issues.

Morgan Stanley — Feb 2025 - Sep 2026
Morgan Stanley Magyarország Elemző Kft. — Budapest, Hungary

Quantitative Model Developer,
Corporate FP&A

- [Forecasting] Developed Net Interest Income forecasting model for CCAR using **ARDL specifications with macroeconomic drivers**. Conducted data cleaning, exploratory analysis, model specification and estimation, backtesting, validation testing and documentation.
- [Regulatory Stress Testing] Developed capital allocation models for trading and loan books used in **CCAR and DFAST exercises**, supporting forward-looking capital planning under regulatory stress scenarios.
- [Model Governance] Worked closely with FP&A Controllers, model owners across business units, and Model Risk Management throughout the **model development and review process**, incorporating business and model-risk requirements into quantitative specifications.
- [Project Management] Translated business assumptions into model specifications, **coordinated modelling requirements across stakeholders**, and presented model methodology and results to business and risk-management stakeholders.

Central Bank of Hungary — Nov 2018 - Oct 2024
Magyar Nemzeti Bank — Budapest, Hungary

Research Economist, — Jan 2022 - Oct 2024
Economic Research Dep.

- [Volatility Modeling] Built **GARCH** models to analyse the change in their predictive ability after the pandemic. Also implemented code for **regime-switching GARCH-MIDAS** model in Python.
- [Financial Event Study] **Analysed the impact of geopolitical events on the stock and sovereign CDS markets**. These studies covered various research designs, from simple regression-based event studies through expectation quantification to including Granger networks.
- [Asset Pricing] **Analysed multiple risk factors / pricing anomalies using LSEG Datastream's granular firm-level data**. This involved data cleansing to eliminate known discrepancies, implementing the Fama-MacBeth two-step regression, and conducting comprehensive backtesting and portfolio evaluation to validate models.

Junior / Medior / Senior Analyst, Aug 2019 - Dec 2021
International Monetary Policy Dep.

- [Monetary analysis] **Monitored key nations' economic dynamics, inflation trends, and monetary policies**, including the United States, Switzerland, Norway, Australia, and New Zealand. Evaluated monetary policy decisions based on their implications for inflation and labour market fluctuations.
- [Automation] Using M language, VBA, and Power Query **automated a large part of the monitoring process, effectively reducing the production time of briefings and presentations by 80 per cent**.
- [Communication] Consistently delivered scheduled and ad-hoc briefings to the Central Bank's (MNB) senior leadership and the Monetary Council (MC), offering critical insights into global trends that influence monetary policy. Over the period, **compiled 100+ briefings and presentations**.
- [Forecasting] Worked on empirical macroeconometric models, such as **Bayesian vector autoregressions** (BVARs), and used these models to forecast macroeconomic trends and execute scenario analyses pivotal for internal strategic studies.

Junior Analyst, Nov 2018 - Jul 2019
Macroprudential Policy Dep.

- [Automation] Improved the reporting processes, data access and analysis with SQL and VBA. **Reduced the regular recalculation of bank capital buffers from 2 weeks to 3 days**.
- [Communication] Regularly compiled and delivered briefings and presentations to the senior management, providing insightful analyses and updates to the Financial Stability Council.

TEACHING

MNB Institute
John von Neumann University
Aug 2022 - Jul 2024
Budapest, Hungary

Lecturer,
MNB Institute

- [Teaching] **Taught advanced-level econometrics** covering statistical theory, finite-sample and large-sample theory of linear regression, and bootstrapping.
- [Teaching] **Taught an elective course on economic policy analysis** covering the analysis of labour market and inflation dynamics, the assessment of fiscal and monetary policy, and balance of payments analysis.

RELEVANT COURSES AND CERTIFICATIONS

Barcelona School of Economics - Summer School Courses

- Harnessing Language Models (2024): NLP, TF-IDF, RNN, Transformers, BERT, LLM, RAG, Hugging Face Tools
- Statistical Machine Learning (2024): Bayesian Statistics, Regularization, Model Averaging, Double Machine Learning, Nonparametric Regression, Variational Inference, HMC, Bag-Of-Words
- Time Series Methods for Risk Analysis (2023): GARCH, DCC-GARCH, CoVaR, SRISK, Growth-at-Risk
- Time Series Models for Macroeconomic Analysis II (2023): Dynamic Factor Models, Markov-Switching Dynamic Factor Models, GIRFs, Growth-at-Risk

- Time Series Models for Macroeconomic Analysis I (2022): Identification methods for VARs, FAVAR, TVP-VAR

Bloomberg for Education

- Bloomberg Market Concepts (2023): Bloomberg Terminal Basics, Equity Valuation, Fixed Income, Currencies

Óbuda University

- Programming 1 - 4: C#, Git, Algorithms, Data Structures, OOP, SOLID, .NET Core, Entity Framework, ORM, WPF, MVVM, Clean Code, Test-Driven Development, Design Patterns
- Machine Learning, Deep Learning 1-2: Python, Keras, scikit-learn, Clustering, Classification, Regression, Boosting, Loss Functions, Activation functions, Neural Networks, ANN, CNN, RNN

Oesterreichische Nationalbank - Summer School Course

- Economic Policy Evaluation (2021): RCT, Diff-in-Diff, Synthetic Control, RDD

DataCamp

- R Data Analysis Track (2017): tidyverse, dplyr, data.table, ggplot2
- R Developer Track (2017): tidyverse, dplyr, functional paradigm

LANGUAGES

- Hungarian: Native proficiency
- English: Full professional proficiency
